

Micro

Lightweight Traffic Control Solution

Our best selling base unit, Micro is popular due to its lightweight yet robust construction and compact design. The design features an integrated transport handle and tilted control panel, and can be fitted with traffic or pedestrian signal heads and a range of controllers. Micro has galvanised steel and riveted construction as standard, and can be custom painted to suit customer brand colours.

APPLICATIONS

Pedestrian

FEATURES

- Robust, lightweight and compact design
- Can be fitted with traffic or pedestrian signal heads
- Compatible with a range of controllers

 **Portable**

The innovative solution for a safer, greener and more efficient roadworks environment.
www.TrafficGroupSignals.com

Micro is lightweight, robust and compact and popular thanks to its customisation options

Micro

VEHICLE SIGNAL HEAD

The rugged, 3-aspect traffic head features a one-piece design and is built to last. The LED optics are capable of automatic dimming and current monitoring to achieve longer run times.

The traffic light head features an integrated AGD vehicle detector, protected from knocks and vandalism. The signal has a protective recess for the antenna and signal dimming sensor and individual aspect doors make it easier to maintain and replace damaged or worn components.

PEDESTRIAN SIGNAL HEAD

The 2-aspect pedestrian head features the same tough design as the vehicle head, using easy-to-maintain low energy LED optics.

The compact size of the Micro enables the pedestrian signal to be situated on the pavement without obstructing the pathway.

The high quality LED 'WAIT' indicator can be optionally fitted with a RADIX® tactile and/or audible sounder to assist the deaf, blind and partially-sighted community.
