

# Security Clamp

## for RadioMaster Traffic Signals

Battery theft is a common occurrence in portable signals, costing traffic management companies thousands and causing widespread disruption to the public.

Our Security Clamp is designed to deter and prevent battery theft from RadioMaster portable traffic signals. Whilst the clamp is relatively lightweight and easy to fit, it has been built to make unauthorised removal almost impossible.

### FEATURES

- For RadioMaster signals
- Prevents theft and trolley movement
- Anti-vandal construction from EN 10111 carbon steel
- 20kg total clamp weight
