

Roof mounted solar panels save fuel all year round

Automatic self charging, hybrid power system

Batteries + economical generator

eco Hybrid 22.9

CLUB 100

- ✓ Reduce CO2 emissions
- ✓ Reduce Noise
- ✓ Reduce Fuel costs

WF0044

Free Energy
Our unique patent pending intelligent solar controls produce free sustainable energy all year round

Automatic Operation
Just add fuel and use. The system will distribute power where it's needed & the generator will start/stop automatically.

As part of our on-going commitment to improvement we reserve the right to alter specifications, designs or figures, without prior notice. All dimensions and weights are approximate. HYDRAULIC AXLE SETUP TIMES: While in un-hitched state, timed from the start of axle retract sequence, until the unit is seated and the cabin door is opened. (i) Typical usage day = 10 hours per day, 130 days in winter mode and 130 days in summer. (ii) £1.80p per litre white diesel (iii) includes 500w office output (iv) Solar panels achieve maximum output in direct sunlight, but they work in normal daylight and cloudy weather too. The amount of power a solar panel or charging kit generates in cloudy weather will be lower compared to direct sunlight. Also the positioning of the cabin will affect the solar charging of the batteries i.e. under trees, etc. (v) This assessment doesn't take in consideration the usage of the hydraulics (vi) This assessment is guidance ONLY
