

CARBON8 T3 LIGHT RANGER

A battery-powered mobile lighting tower that replaces a diesel generator lighting tower, cutting fuel costs and site emissions to zero while running. Fitted with a high-capacity battery and fast-swap design.

Working near homes, schools or hospitals? Silent running keeps your night shifts on the right side of noise restrictions, with no engine hum to disturb neighbours or your team.

With no fuel to deliver, store or spill, your site stays cleaner and safer. You get reliable light exactly where you need it, without the hassle of a diesel tower.

- Zero emissions and completely silent running
- Runs up to 40 hours on a single charge
- Removes fuel costs and refuelling trips entirely
- Light enough to be moved by one person
- Motorised column extending to 3.8m
